DETAILED ACTION

This is the **Final Office Action** for application number 10/821,395 Flat Panel Display Mounting System, filed on 4/9/04. Claims 1, 3-10, 12-21 and 23-25 are pending. This **Final Office Action** is in response to applicant's reply dated 8/10/05. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's amendment necessitated any new ground(s) of rejection presented in this Office action.

Claim Rejections - 35 USC § 102

Claim 1, 4-10, 13-21, 24 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent No. 5995179 to Tamura et al.

Tamura et al. a mounting system for detachably coupling a pair of bodies, including a flat panel electronic display (12) and a support structure (10(C)) having a plurality of fastening buttons (20a-c) operably coupled to flat panel display, each fastening button being formed of electrically insulating material (See Col. 3, lines 10-16 for plastic insulating material) and having a base portion, the support structure having an adjustable mounting system (40) operably coupled with a fixed structure, a head portion and a throat portion therebetween, and a display connecting portion (26, Fig. 11) operably connected to the support structure, having a plurality of keyhole slots defined therein and arranged in a polygon, spaced substantially equal distance from each adjacent slot, the slots having an access portion having a periphery and a notch in the

Application/Control Number: 10/821,395 Page 3

Art Unit: 3632

periphery, the display connecting portion further having a ramped region/means for guiding the head portion (26X, See Col. 4 lines 65) extending from the periphery of the access portion of the key hole slot in a direction opposite the notch, wherein the flat panel electronic display device can be selectively oriented horizontally or vertically interchangeably and is electrically insulated from the fixed structured by the fastening buttons so as to inhibit conduction of radio-frequency.

Claim Rejections - 35 USC § 103

Claims 3, 12 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over United States Patent No. 5995179 to Tamura et al. as applied to claim 1, 10 and 21 and in view of United States Patent No. 4020213 to Berglowe, Jr. et al.

Tamura et al. teaches the basic inventive concept with the exception that it does not specifically teach that the electrically insulating material is made from PVC.

Berglowe, Jr. et al. teaches that electrical insulation made from PVC is well known in the art at the time of the invention. (See Col. 4 lines 8-10). Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to have used PVC for the electrically insulted material, in order to insulate the electronic display.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number: 10/821,395

Conclusion

Page 4

THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action. Any inquiry concerning this communication should be directed to Amy J. Sterling at telephone number 571-272-6823. The examiner can normally be reached (M-F 8 a.m.-5:00 p.m.). If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Robert Olszewski can be reached at 571-272-6788. The fax machine number for the Technology center is 7571-273-8300 (formal amendments) or 571-273-6823 (informal amendments and communications). Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center receptionist at 571-272-3600.
